TECHNICAL WRITER | ENTERPRISE SOFTWARE DOCUMENTATION

PROFESSIONAL SUMMARY

Technical Writer with experience creating and maintaining enterprise software documentation, including user guides, troubleshooting content, FAQs, feature documentation, and release notes for Log360 on-premises and Log360 Cloud. Skilled in validating product workflows, clarifying technical requirements with engineering and product teams, and reviewing UI text for accuracy, clarity, and consistency. Experienced in CMS-based content publishing and in building an AI-assisted workflow, with writer verification, to support UI text review. Familiar with technical writing standards, Git version control concepts, and structured authoring fundamentals (DITA and XML).

CORE SKILLS

Technical Writing: User guides, product documentation, troubleshooting guides, FAQs, release notes, installation and configuration documentation

Editing and Content Quality: Technical editing, proofreading, content validation, documentation consistency, UI microcopy review

Documentation Workflows: CMS publishing, documentation standards, content review cycles, documentation maintenance

Technical Collaboration: Requirements clarification, developer collaboration, SME interviews, product workflow validation

AI-Assisted Workflows: AI-assisted content review, text matching, human verification

Structured Authoring: Foundational knowledge of DITA and XML

Technical Fundamentals: Markdown, HTML, CSS, basic SQL, Git version control concepts, basic Python and Java code reading, networking fundamentals; familiar with SIEM and log analytics

PROFESSIONAL EXPERIENCE

Technical Writer | Zoho Corporation (ManageEngine), Chennai **Nov 2025 - Present**

- Create and maintain product documentation for ManageEngine Log360, an enterprise SIEM and log-management product, across both Log360 on-premises and Log360 Cloud, including user guides, feature documentation, troubleshooting content, FAQs, and release notes.
- Document product installation and configuration workflows, including AWS installation and configuration for Log360, with clear, step-by-step instructions.
- Validate product workflows and configuration steps to ensure documentation accurately reflects product behavior; reproduce workflows to investigate discrepancies between documentation, UI behavior, and engineering feedback.
- Collaborate with developers, product managers, and QA teams to clarify technical requirements and resolve documentation gaps before publication.
- Review UI microcopy, including labels, instructions, and validation messages, for clarity, grammar, consistency, and technical accuracy.
- Developed an AI-assisted UI-text review workflow to improve wording consistency and reduce repetitive review across product UI strings (details below).

Content Associate | Amazon, Prime Video Digiflex **May 2024 - Oct 2025**

- Created internal documentation standards and managed metadata and content publishing through a CMS while following quality, compliance, and SLA requirements.
- Reviewed and validated 500+ content samples daily with over 98% accuracy in an AI model-training workflow.
- Collaborated with QA to improve team throughput by 15%.

SELECTED PROJECT: AI-ASSISTED UI-TEXT REVIEW WORKFLOW

- Developed an internal workflow that compares new or revised UI text against approximately 13,000 approved product strings to identify existing wording and improve consistency.
- Included a human-review step to ensure a writer verifies each suggestion before it is applied, keeping editorial judgment and content accuracy central to the process.

EDUCATION

B.Tech, Civil Engineering | Heritage Institute of Technology, Kolkata **2018 - 2022**

GPA: 7.0/10
